DETAILED ACTION

Claim Objections

2) Claims 63-64 status identifiers should recite - (withdrawn) -.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3) Claims 13-14 are rejected under 35 U.S.C. 102(a) as being anticipated by Strandqvist (WO 03/083197). Strandqvist discloses a fibrous web made of a plurality of cushion portions each having a first basis weight, and a plurality of surrounding portions each having a second basis weight, wherein the cushion portion first basis weight is greater than the surrounding portion second basis weight (Abstract, and claim 1 on Page 10, lines 4-11). The cushion portions are of a first thickness and the surrounding portions are of a lesser second thickness as shown in Figure 3.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4) Claims 1, 3-12, 15-21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15, 17-19, 45-59, 61-63, of copending Application No. 10/768423. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the copending application disclose the process of forming a structured web with a paper machine that includes providing a fiber slurry through a headbox to a nip formed by a structured fabric and a forming fabric, collecting fibers in valleys of said structured fabric and dewatering through the forming fabric.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

- 5) Claims 1, 3-12, 15-21 would be allowable upon overcoming the Double Patenting rejection.

Response to Amendment

- 6) Applicant's arguments with respect to pending claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- 7) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Von Paleske (US 6,554,959) discloses fibrous tissue webs having areas of elevated basis weight followed by areas of lesser basis weight.

- 8) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone no. is 571-272-1190.
